

Capture your field data in real time.

## FIELD AND OFFICE. CLOSER THAN EVER.

With Cenozon's FIND, you can easily locate assets, perform inspections, document workflows and share real-time digital data between the field and office.

### STREAMLINE YOUR FIELD OPERATIONS

Cenozon's FIND is the digital oil field's answer to operations. No need to drive back to the office - access your paperwork and maps right in the app.

Available on any mobile device.

Capture and store photos and field notes in real-time - online using data or Wifi, and one-touch data sync while offline

Easily locate your assets and crossings, accurately record their GPS coordinates, and receive directions to each location

Prioritize workflows for pigging, valves, water crossings, signage, wellsite equipment and more, all organized into a cloud-storage database

Customize inspection or activity types, and with digital documentation and cloud storage, easily access, share and verify data company-wide

## THE MOBILE FIELD OFFICE

THE OLD WAY	THE CENOZON WAY
<b>Paper Maps</b> Plot your route on a paper map of assets and compare with local maps.	<b>GIS Mapping</b> View colour-coded assets on a GIS map and proceed with GPS route guidance.
<b>Paper Documents</b> Search for the asset on location and perform the inspection or activity. Handwrite the data on paper, in binders.	<b>Real-Time</b> GPS locate the asset to within one meter and complete the customizable activity forms, attach images and upload to the cloud.
<b>Manual Data Entry</b> Fax information back to the office to be consolidated, then manually prioritize follow up and work orders.	<b>Digital Data Reporting</b> Data integrates automatically and is shared with the office. Reporting indicates assets which require further attention.

*"This app saved us tons of time doing paperwork and fielding questions from head office. The data was accurate, consistent, accessible company-wide and verifiable with the accompanying photos. It's like having a field office right on your phone."*

– Field Supervisor, Mid-sized Pipeline Operator

## INCREDIBLE CUSTOMER SUPPORT

Cenozon's FIND offers innovative technology that's dependable and easy to use, but when you have questions or need customizations, Cenozon offers fast, helpful support. Visit [cenozon.com](http://cenozon.com) for more information on customized workflows.

### DELIVERING INNOVATIVE PIPELINE SOFTWARE ON EVERY FRONT

Ask about Cenozon's comprehensive suite of software for oil and gas pipeline operators: Pipeline Integrity Risk Manager, Measurement Manager, Measurement Schematics, PAS Schematics and InstantChart™. [LEARN MORE AT CENOZON.COM](http://cenozon.com)
