

**Validation process  
made seamless.**

## **AUTOMATICALLY ORGANIZE, VALIDATE, AND SCHEDULE CALIBRATIONS**

Cenozon's Measurement Manager software can save you time by centralizing your calibrations and analysis online. You no longer need to search separate files or call the field for copies - you now have everything in the same accessible location.

### **THE MEASUREMENT REVOLUTION**

Welcome to the digital world of measurement. Cenozon's leading software will save you money by automatically organizing your calibration schedules by area, and automatically tracking your calibrations for exemptions.

With Measurement Manger, calibrations are entered directly into digital forms and automatically loaded into the software

Track, manage and schedule your calibrations and analysis by company hierarchy and simplify regulatory compliance

With workflows designed to meet EPAP & Dir 17, analysis and calibrations that are not compliant are automatically flagged

Exemption reports are generated automatically for meter calibrations, ensure savings are always utilized and always meet compliance.

# THE ULTIMATE MEASUREMENT TOOL

## TAKE CONTROL OF THE PROCESS

*"I no longer have to wait for reports from the field and I know the data is accurate. The software also automatically reports on meters that qualify for exemptions - saving us 30% on calibration costs alone."*

**– Current Cenozon Client, Measurement Specialist**

## INCREDIBLE CUSTOMER SUPPORT

Measurement Manager offers solid technology that's dependable and easy to use, but when you have questions or need customizations, Cenozon offers fast, helpful support.

## DELIVERING INNOVATIVE PIPELINE SOFTWARE ON EVERY FRONT

Ask about Cenozon's comprehensive suite of software for oil and gas pipeline operators: Pipeline Integrity Risk Manager, Measurement Schematics, PAS Schematics, HydroFlow and InstantChart™ [LEARN MORE AT CENOZON.COM](http://CENOZON.COM)
