Pipeline Integrity Risk Manager 

**47% lower incident rate  
versus industry average.**

## THE TRUSTED TOOL FOR PIPELINE INTERGITY RISK MANAGEMENT

PIRM lets you seamlessly evaluate risk and exceed compliance requirements across your entire network. The comprehensive cloud-based software integrates with popular third-party applications and is accessible from any device at any time for accurate, real-time risk management.

### SEAMLESS DATA ANALYSIS AT A GLANCE

PIRM's intuitive dashboard gives you a highly accurate visual representation of your assets and provides instant visibility of pipeline risk. The built-in GIS mapping interface not only helps you understand the location of your pipelines and facilities, it flags the associated threats and hazards so you can easily identify and prioritize risk.

### FLEXIBLE CONFIGURATIONS

Tailor PIRM's applications to your own workflow for a fully automated line-by-line assessment of your pipeline network. Define your own matrix of probability and consequence based on location, connectivity, geo-hazards, pigging and chemical programs, historical production, inspections and more.

HOW MUCH TIME & MONEY WILL YOU SAVE?

Save Time. Save Money. Meet Compliance.

## MAKE DATA-DRIVEN DECISIONS

### FEATURES & BENEFITS

#### FULLY AUTOMATED RISK ASSESSMENT

For every 25 meters of pipeline, evaluate multi-dimensional consequence and probability analysis. Risk factors are customizable by company threshold.

#### IN-DEPTH DETAIL

Detailed dashboard and built-in GIS mapping interface to easily review current process conditions: flow, chemistry, topography, temperature, pressure.

#### RISK MITIGATION

Automated risk notification system including mitigation recommendations, so you can focus on critical tasks and dramatically reduce incident probability.

#### GEO-HAZARDS NOTIFICATION

WildFire and HydroFlow offer industry-unique monitoring and instant notification systems for wildfires and abnormal water flow conditions.

#### COST SAVINGS

Realize significant tax savings with the decommissioning module and reduce costs by monitoring line activities, vendor progress and chemical programs.

#### EFFICIENCY

Streamline productivity with automated features: field and data integration, common storage, deficiency flagging, optimization, mitigation, bulk reporting, and more.

*"PIRM gives us a new level of control and enables us to maintain the system on our own - keeping annual costs low."*
